---

## Summary

I aspire to create value in others by providing them an environment in which they can achieve their potential. Some of my greater skills are generating ideas from first principles, systemising a problem and providing communication so it can be deeply understood.

## Career history

### **Quantitative Business Analytics Tutor Helper** at University of Sydney

02/2022 - Current

This course teaches BCom students how to use quantitative techniques to analyse business problems. It shows how to interpret data involving uncertainty and variability; how to model and analyse the relationships within business data; and how to make correct inferences from the data (and recognise incorrect inferences).

#### **Key achievements**

- Teaching students the importance of data and how to analyse it correctly.
- Solve all IT problems that act as an obstacle to achieving a deep understanding of the course content.

### **Technology Researcher** at Simbolo

04/2022 - Current

Simbolo builds new technology units/innovation labs inside of the client's company that can either retain the technology for competitive advantage or eventually spin out as an independent company to solve wider industry problems.

#### **Key achievements**

- Designing the framework to best interpret data from clients and wider industry.
- Collecting, analysing and interpreting the data to provide insights to the clients.

### **Multiple Roles** at Melbourne University Sport

09/2018 – 05/2020

### **Key achievements**

- Staff Award 2020 for outstanding service. This recognises me as the top 5% of the working body of Melbourne University Sport.
- I organised and partially developed an online interface for membership administration and venue bookings.
- I created and managed new database systems for venues and events of the university sporting facilities.
- When acting as Duty Supervisor, I was the first point of contact for all issues on the main campus facilities. I liaised with several user groups, including other staff and contractors.
- I solved multiple complex member enquiries regarding gym membership, clubs, facilities, etc.

### **Education**

**Bachelor of Science/Diploma of Languages** from The University of Melbourne  
(Majors: Mathematical Physics and Spanish)

Graduated 11/2020

Science WAM: 71.5, Language WAM: 79.5

**(National Scholar) Bachelor of Science/Bachelor of Commerce** from The Australian National University (Majors: Mathematics, Physics, Finance)

Enrolled as a National Scholar in 2017.

National Scholars are selected based on their leadership display at the Tuckwell Scholarship interview weekend.

### **Programming Skills**

Proficient/everyday use: Python, Linux shell scripting, GitHub, LaTeX.

Comfortable/regular use: R, MATLAB, SQL, Julia.

### **Leadership**

**Group Organiser** at Walk4BrainCancer

2020

### **Key achievements**

- I lead a large group through social media to raising \$46k towards children with brain cancer.
- Making my stepdad proud of his kids one last time before he got too sick.
- This whole program occurred during stage 4 lockdown in Melbourne and showed me the true power of social networking.

**College Captain** at Diamond Valley College

2016

### **Key achievements**

- I lead a small group of students to raise \$3000 for 'Do it in a Dress' charity.
- My team lead various anti-bullying days to promote kindness amongst students
- I generated ideas towards the Bendigo Bank Community Bank 'Youth Employability enhancement' project.
